Wholesale Hosted Communications white label datasheet

Using our white label datasheet

When you downloaded the zip file, you will have noticed various documents inside. The first is this one in which we explain the purpose of the datasheet and how best to use it.

Word document

This contains all the content you need to design your own datasheet.

- Your marketing team or agency can copy and paste the content into their design version

- When you see instances of [Company Name] and [Product Name], please insert your own details

- It's already been formatted into a suggested guide so you don't have to move anything around

- For an idea of the layout you can take a look at the BT datasheet also included within this zip download.

Asset folder

This contains all the graphics you need to add to your datasheet.

- Visual representations of the product make up part of this datasheet

- The source files for these graphics can be found within the Asset folder

- Your marketing team or agency can use these graphics when adding to the design version.

Our aim

We want to help you sell your own version of Wholesale Hosted Communications (WHC). As this is a combined proposition that can either use Hosted Centrex, SIP Trunking, or a combination of both, it will appeal to customers of varying sizes. You will be able to take them on a Unified Communications journey, enabling them to use cloud technology and grow it as their own business does.

Contents

- A summary of the product and what it's comprised of

- An overview of the hosted market and how this solution fits in

- Big benefits and key details

- Information on why your customers should choose you and your solutions.
