

Interconnect Circuits – Lead Time Reductions

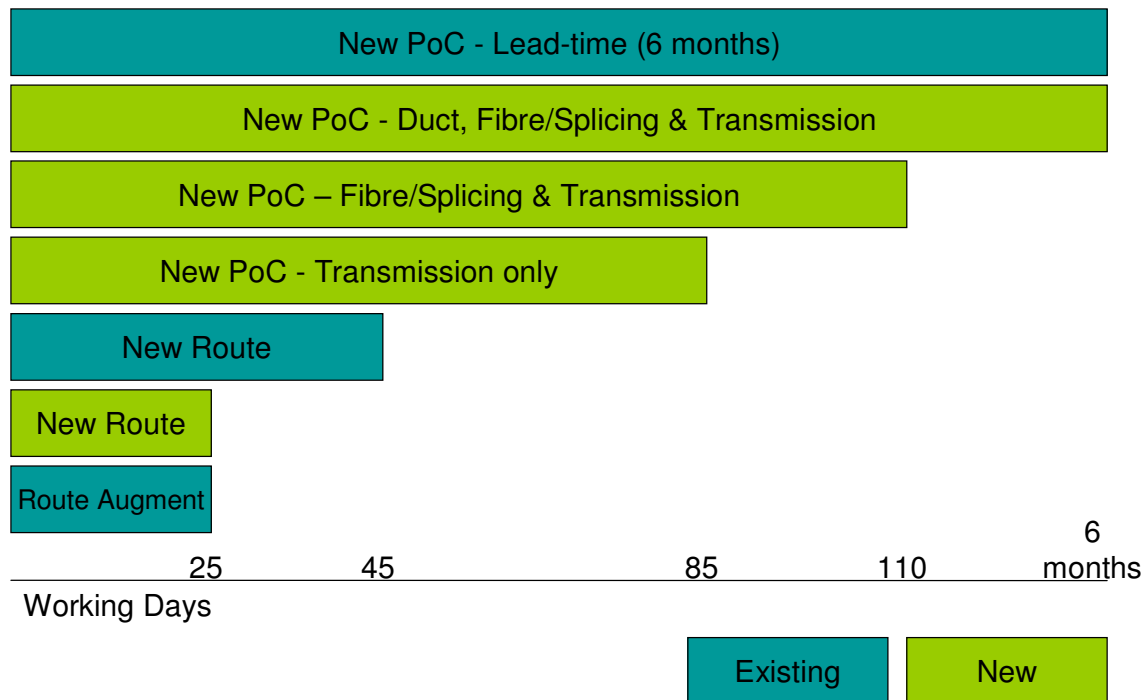

Briefing Audience:

Public Electronic Communication Network Providers

Interconnect Notification (Ref: 122/08)

BT is pleased to announce that with effect from Monday 18th August 2008 lead time reductions will be implemented for both Interconnect infrastructure provisions where no new duct is required and Interconnect 'New Route' orders.

New Lead-Times

Identification of the correct delivery type for new infrastructure provisions will be managed using the existing Advanced Capacity Order (ACO) process and an 'Agreed ACO' will identify the applicable lead-time for each new Point of Connection (PoC).

This will not only ensure that orders are processed appropriately by BT but will also allow our customers to better plan their network growth.
