An interactive guide to BT Wholesale

[show contents](#)

We're making it easy for you to work with us. For you to easily find the information you need on our products and services, when you need it. That's why we created this interactive document.

What you'll find inside

All the most relevant, up-to-date details on our key products such as quick links to important documents, top tips and specialised web content.

[Get started >](#)

As you work through this document, you'll find you need to be logged in to **My BT Wholesale** to view certain content. You can do this from our [homepage](#) (or you will be prompted) – simply enter your BT Wholesale username and password or select **Register a new account** if you're new to the site.

Is your company new to BT Wholesale? Then follow these simple instructions to become our next valued customer. Contact our team to discuss your requirements by calling us on **0800 671 045** or **request a callback** from our contact us page.

This section includes tips and links to the most commonly used sections of our website.

Top tips and useful links

Setting up My BT Wholesale

show contents

A run down on how to set up an account and a look at My BT Wholesale, Business Zone and other parts which will make your life easier.

Registration

Setting up an account on BT Wholesale is simple. From the home page, select **Register a new account** and follow the registration process. Or if you want to quickly get there:

[Register a new account >](#)

Top tips and useful links

Setting up My BT Wholesale (cont'd)

show
contents

My BT Wholesale and Business Zone

When you first log into My BT Wholesale, it will take you to Business Zone or My apps, depending on your setup.

Business Zone is where you can manage your account with BT Wholesale, giving you a consolidated quick view of your orders, faults, and inventory. It has a powerful predictive search that helps you quickly find what you are looking for. You can even search by your own customer reference.

There is a new and improved help screen which gives you the latest information about recent changes on the site and also lots of useful user guides to get you up to speed with how to use it.

Business Zone is personalised to your company and your role. It gives you access to our new speedy Ethernet order journeys, as well as other new features like eChat and online escalations for Broadband.

Business Zone gives you access to the latest information about Major Service Outages (MSOs) and Planned Network Change Notifications (PNCNs) impacting your services. You can find out what action you need to take to ensure your orders and faults keep progressing. You can also get access to My apps from Business Zone too.

If you currently land on My apps when you log in, but want to change this to Business Zone, you can get access to it by request access to eCo Plus (found on **Quote & Orders tab** in **My apps**). Your administrator will then give you permission and you will land on Business Zone the next time you log in.

Our key products - Broadband

Beginning with broadband

show
contents

When it comes to broadband, do you know how we make it easy for you to work with us? We start from the beginning. Right from making sure you've got the right systems in place up to checking for availability and reporting on any issues you may have. Take our hand and we'll guide you on the right path.

Entering Business Zone

We've made it easy for you to manage your broadband orders and faults, track the latest updates and find all the useful information you need. How? With Business Zone.

Business Zone is where you can manage your account with BT Wholesale, giving you a consolidated quick view of your orders, faults and inventory. It has a powerful predictive search that helps you quickly find what you are looking for. You can even search by your own customer reference. When the result is returned you can click on the reference to see the quick view. The quick view gives you access to chat to an agent or raise an escalation, in just one click. Business Zone will fill in known information about the order, fault, or service, for you. This saves you time and reduces the amount of data you need to enter, making it quicker to achieve your task.

Business Zone gives you access to the latest information about Major Service Outages (MSOs) and Planned Network Change Notifications (PNCNs) impacting your broadband services. You can find out what action you need to take to ensure your broadband orders and faults keep progressing. You can also get access to Billing and My apps from Business Zone too.

If you don't already have access to Business Zone, you just need to request access to eCo Plus (found on **Quote & orders tab** in **My apps**). Your administrator will then give you permission and you will land on Business Zone the next time you log in.

Easy communication

show
contents

Chat with an advisor

Got a problem and need someone to talk to? Then try our eChat feature and let your fingers do the talking. Log into **Business Zone**, search for your **broadband order or fault** and click on the **reference** to see the quick view. You'll see the latest update but to initiate chat, click on the relevant **live eChat button** and you'll be taken to the Chat with an advisor section. Enter a service or fault reference and our team can start helping.

Start chatting >

Failed Retest eChat

Under certain criteria, you can use our Failed Retest eChat service to try and resolve your problem. If you are affected by the following scenarios then start chatting now:

- **cross-jumper issues** - for example, a post migration failure
- **profile changes/CCSNR** - we will only accept eChat queries when the request has been initiated but not completed within four hours
- **stabilisation period** - where you have a No Sync or No Connection fault during the initial ten day stabilisation
- **port issue on the DSLAM/MSAN** - we'll complete further diagnostics to resolve the issue remotely or determine the next appropriate action
- **authentication failures** - if the circuit mapping has been built incorrectly and you tried to complete a port reset via self-serve.

We're here seven days a week between 8am and 8pm to chat with you.

Escalations

If you need to bring orders or faults to our attention immediately without the need for calling or talking via eChat then you can do so via **Business Zone**. Log in and click on the **reference** to see the **quick view**. From here, simply click on the **escalation flag**. If the flag is red then an escalation has already been raised. You can see the latest information by clicking on the flag.

You can also go into the **Orders** page or **Repairs & Faults** page to see all orders or faults, including those with escalations. If you only want to see escalated orders or faults, then you can filter by escalations only. If you want to get more detailed information on each escalation you can click on reports.

Request for Outage (RFO)

If you are a WBMC customer with Host Links and are experiencing a loss of service across the links, you can request an investigation by sending the following information to proactive.repair@bt.com:

- WBMC Dedicated
- contact details - phone number/email
- Loss of Service to BGP - yes or no?
- A/B Leg is down?
- provide the BBCH
- start date/time
- finish date/time
- Interconnect site
- Associate BGP IP addresses
- Associated BBEP reference
- 24 hour access to intrusive test?

You then need to follow this up with an eChat to confirm the RFO so we can raise it for you. This can be done by choosing **eChat** from the **Broadband incident helpdesk**. The lead time for this whole process is 48 hours.

Ethernet

show
contents

With the greatest range of access options in the UK, our Ethernet solutions can help you deliver high-quality connectivity to your customers, whatever their size. With Ethernet in the First Mile (EFM), dedicated fibre and next-generation fibre, we can help boost your selling power.

Early start with Ethernet >

Services and support >

Wholesale Ethernet overview >

Harmonised Ethernet Additional Reporting >

The future >

Our key products - Ethernet

Early start with Ethernet

[show contents](#)

We've been investing heavily into next-generation fibre so you can tap into new market opportunities. But that's not the only way we're helping you with our great Ethernet offering – we've also conveniently placed all the information you need right here.

Entering Business Zone

We've made it easy for you to manage your Ethernet orders and faults, track the latest updates and find all the useful information you need. How? With Business Zone.

Business Zone is where you can manage your account with BT Wholesale, giving you a consolidated quick view of your orders, faults and inventory. It has a powerful predictive search that helps you quickly find what you are looking for. You can even search by your own customer reference. When the result is returned you can click on the reference to see the quick view. You can also get access to Billing and My apps from Business Zone too.

Business Zone gives you access to our speedy new Ethernet order journey. The new order journey provides a more intuitive ordering experience, with common options being pre-populated for you. More validations are run up front, saving you time, and you'll notice a new interface that makes it clearer for you to see what you've done and what to do next. The new order journey can now be accessed by the latest browser versions. It's now faster to order Ethernet with customers informing us they can place an order in under ten minutes.

Our key products - Ethernet

Early start with Ethernet (cont'd)

show
contents

But we're not stopping there...there are always further improvements to the online Ethernet order journey over subsequent releases. All based on feedback we get from you.

Please note, from 14 May 2017, the Etherway, Etherflow and Copper order journeys have closed on eCo Plus. All access to these journeys are now via Business Zone.

If you don't already have access to Business Zone, you just need to request access to eCo Plus (found on **Quote & orders** tab in **My apps**). Your administrator will then give you the permission and you will land on Business Zone the next time you log in.

Address Matching Guide

The new Ethernet order journey now lets you search by Unique Property Reference Number (UPRN). When you search by UPRN instead of a postcode it gives you an exact match on the location of the premises you need your Ethernet service installed. This is particularly helpful when there are multiple premises in one building and speeds up the time it takes for you to add the address to the order.

[Find out more about UPRN >](#)

Order Progress – KCI updates

Using the Business Zone portal you can track your order progresses. When you initially place an order you can select your preferred method of receiving updates – your information will be provided at key milestone points known as Keep Customer Informed (KCI) points.

Excess Construction Charges (ECCs)

Occasionally ECCs will be applied to an order. These will be advised at KCI2 and confirmed at KCI3 and are accepted via the Business Zone portal.

Daily update tracker

If you want a daily report consisting of an overview of your outstanding orders, just let us know. Contact your account manager and they'll get it set up for you.

Harmonised Ethernet Additional Reporting

[show contents](#)

If you require a Reason for Outage (RFO) report after a fault that usually clears before a fault is raised or diagnostics are run, then please follow this simple process:

- raise a Non-Live fault on eCo Plus. This will be picked up by the diagnostic team and a response via eCo Plus will be received in five working days.

If, however, you need to request a full report after a fault has been diagnosed and rectified then this must be requested via your account manager who will then submit the request. Responses are delivered back to you within five working days.

Lastly, if you require more information on a fault that is cleared but not yet closed, simply reject the clear on the open fault and make the request as the reason you have rejected the clear. This will go to the diagnostic team and an update will come back via eCo Plus.

The future

If you want to find out more about what is changing in the Ethernet order journey, take a look at our roadmaps.

Our key products - Wholesale Calls

Wholesale Calls Line Independent (WCLI)

show
contents

Getting started

We provide the widest range of voice services in the UK and now we're helping you to do just the same with our white-labelled telephony solution. With no major upfront investment or high running costs, Wholesale Calls is the simplest way to offer more.

Entering Business Zone

We've made it easy for you to manage your orders, report faults, track updates and find all the useful information you need. How? With Business Zone.

Business Zone is our online portal that makes it quicker, simpler and easier to do business with us. Business Zone can be set up through eCo Plus which can be accessed via **My apps**. Once you have done this and permission has been granted, the next time you log in you to My BT Wholesale you will see a snap shot of your account. You can keep in control of all your orders, faults and product inventory, use the instant search function to find what you're looking for and have all your online billing and orders in one convenient place.

SPHUR

An affective high spend monitoring capability for Service Providers. It detects and actions potential high spend (risk) from all end customers.

SPHUR Lite

An email alert option that sends alerts five times a day, detailing when a CP chosen threshold for cumulative in-day spend has been breached.

Auto Call Barring is also available on SPHUR Lite – an automated capability to request an Outgoing Call Bar (OCB) on a CLI when a CP-chosen threshold has been breached.

Access to the web-based SPHUR system

Call data is received every two hours and cumulative in-day spend refreshed providing 'near real-time' high spend monitoring. This enables:

- bespoke reports by type of spend
- CP to check and review the cumulative spend for CLI/customers
- ascertain which call category the spend was associated to, for example premium rate service or international calls
- CP to drill down to review the associated calls
- CP to add notes against the CLI for future reference.

For more information, including pricing, please contact your account manager.

Our key products

Hosted Centrex

show
contents

Unified Communications (UC) encompass the integration of real-time, enterprise and communication services such as VoIP, Instant Messaging, audio and video conferencing, desktop sharing and much more. Hosted Centrex is our complete, white-label UC service – a complete package which enables you to sell all the services and extra features your customers need to properly utilise UC.

As of June 2017, our existing Hosted Centrex offering has moved to our new Wholesale Hosted Communications (WHC) offering. Yes, it might have a familiar abbreviation but it's a new solution that combines the best elements of Hosted Centrex and SIP Trunking on one proposition.

A one-stop portal

We've made it easy for you to manage your Centrex orders and faults, track the latest updates and find all the useful information you need. How? With Business Zone.

Business Zone is where you can manage your account with BT Wholesale, giving you a consolidated quick view of your orders, faults and inventory. It has a powerful predictive search that helps you quickly find what you are looking for. You can even search by your own customer reference. When the result is returned you can click on the reference to see the quick view.

If you don't already have access to Business Zone, you just need to request access to eCo Plus (found on **Quote & orders tab** in **My apps**). Your administrator will then give you permission and you will land on Business Zone the next time you log in.

Inbound Services

show contents

Let our high capacity and highly resilient intelligent network handle all your inbound traffic. It gives you and your customers full control over how that traffic is managed and can be combined with our other hosted products to create complete customer solutions.

[Inbound Services overview](#) >

Our key products - Inbound Services

Inbound Services overview

[show contents](#)

Customers need to be able to contact businesses. And in many cases the preferred method of communication is by making a telephone call. With our Inbound Services you can create flexible routing plans to manage your incoming traffic. You can also use the statistical information provided to analyse your calls and improve how you handle them, both in terms of efficiency and providing a better experience for your customers.

And by using our new Intelligent Call Services (ICS) platform, you can utilise many new and innovative features, including: advanced IVR, large scale call queuing with call back, call recording with search and transcription, and text-to-speech messaging. You can also combine Inbound Services with our Secure Payments product for a PCI compliant solution.

Talk the talk

Read our brochures to see how you can give your customers smarter call handling.
