

5G for IoT pricing offer

Terms and conditions

The terms of our high-usage 5G tariff for Internet of Things (IoT) applications are set out below.

The offer: We're launching a new 5G service, designed especially for high-demand IoT devices, such as HD security cameras and augmented reality. As part of the launch, we're offering you a low-priced tariff of £50 per 50GB and £1 per gigabyte out of bundle.

How to get this rate

It's simple. You'll find this rate available to you right now when you go to order. You won't even need to swap SIMs to access the 5G service, because our current SIM cards are already compatible.

5G for IoT offer details

- Individual plan of 50GB for £50 a month.
- Overage at £1 per gigabyte.
- Minimum 30-day activation period.
- This tariff is available on 5G, as well as 4G and 3G.

Service features

Running on our award-winning EE network, our 5G for IoT service is ideal for high-usage applications like the following:

- Augmented or virtual reality for remote workers.
- Remote diagnostics tools for medical professionals.
- High-definition surveillance cameras.
- Pop-up sites requiring instant connections from Media and Broadcast to construction sites.
- Broadband backup.
- Wearable remote sensors including smart watches and body cameras.
