

# Narrowband & IP Exchange Reference Offer

## Introduction

BT is required to publish Reference Offers in relation to services provided within SMP designated markets. BT published such Offers on [btwholesale.com](http://btwholesale.com) in accordance with regulatory requirements.

This document provides links to the relevant pages and documentation on [btwholesale.com](http://btwholesale.com) where the published Reference Offers for both PSTN and IP are contained.

In the Fixed Narrowband market, following the 2017 Market Review by Ofcom, the requirement for a Reference Offer applies to:

### PSTN Interconnect

- Call Termination at the Local Exchange
- Call Origination at the Local Exchange
- Interconnect Circuits at the Local Exchange

The Standard Interconnect Agreement (SIA) provides the contractual framework for PSTN Interconnect Services. It should however be recognised that the SIA governs both regulated and unregulated services.

### IP Exchange

For IP Exchange, the reference offer applies to Call Termination only.

The VoIP Main Conditions provides the contractual framework for IP Exchange Services.
