

## Rapid Response Vehicle ensures business continuity

### Mobile coverage, delivered fast

Business continuity planning involves prevention and recovery systems that can deal with potential threats. Our products and capabilities will help you with your business continuity plans by enabling rapid deployment of mobile coverage.

### Your issues

- you face increasing pressures from Ofcom's network availability requirements
- emergency deployments are also becoming more of an issue
- new weather patterns are affecting both the service and communities.

### Our solution

We're ahead of the game – in collaboration with Mobile Network Operators (MNOs), we're building a suite of solutions that can be deployed rapidly for emergency mobile coverage and planned capability. This includes deploying a mobile service anywhere within six hours via our mobile base stations, utilising satellite, microwave or fibre as the backhaul technology to provide 3G or 4G mobile coverage from a 10–15m telescopic mast. We're particularly focusing on keeping networks operational during any type of event (whether planned or an emergency) whilst also supporting enterprise and special projects.

We can provide a fully managed fleet of vehicles, fully equipped as mobile base stations, that can be deployed in emergencies, anywhere in the UK. We can accommodate Nokia, Ericsson and Huawei equipment.

Issued: September 2017
